Capabilities

At Clean Seal, Inc. we specialize in supplying engineered thermoplastic products. We will work with your companies engineers and Technical departments to evaluate and provide the best extruded plastic part for your application. This will entail choosing the right material, design, and application...

Materials:

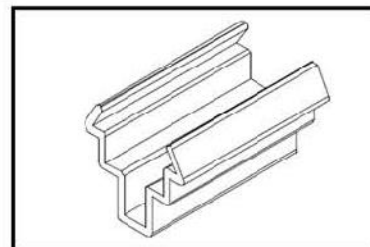

Clean Seal can provide a variety of material selections that meet your industries specifications. These materials include:

- PVC - Rigid & Flexible
- Polyethylene
- Polypropylene
- TPE
- Color
- Anti-slip and UV additives

Design

When it comes to customized solutions, Clean Seal, Inc. will design every product for optimum performance and durability. We will take into account every outside element that can effect the performance of your part. We want to design a part that meets and then exceeds your expectations.

Application

No matter what your specific application demands, Clean Seal, Inc. can handle the job. Whether it is constructing a unique dual durometer extrusion or adding one of our value added secondary services like, cut/splice/glue. Clean Seals' team of professionals is able to give you the expertise and experience that you can trust for quality custom extruded TPE's, molded products and hose.
